

Mobile Tee T-shirt transfer

1. Purchase transfer sheets and read instructions in the pack carefully.
2. Have a t-shirt ready that you'd like to print on.
3. Download WHITE for a white t-shirt, DARK for a dark coloured t-shirt.
4. Print out download design on the transfer sheets.
5. Line up both sheets via registration marks [⊕].
6. Iron on according to instructions in the pack you purchased.

Author's note: This design does looks cool on any light colour t-shirt, however I think that nothing beats a good yellow t with big black text on.
